Zirconia Abrasive Kit

This Zirkon Master abrasive kit (2670) includes an assortment of eight rotary burs for use on zirconium oxide materials. The abrasives remove material quickly without transferring heat, while leaving a smooth surface. The long-lasting abrasives are engineered to ease the processing of zirconium, alumina, and IPS Empress.

Instruments are contained in a 50-by-40-by-68-mm holder box with a hinged lid.
